

Material Safety Data Sheet

91/155/EEC

Revised : 27 / 03 / 2007

Date of Printing : 22/10/2007

Page : 1 / 4

1. Identification of the Substance / Preparation and Company**Product Name & Use :**

Ground Gypsum Superfine White, Ground Gypsum FG200, Agricultural Gypsum

As a filler, carrier, extender in proprietary formulations and for soil conditioning

Manufacturer / Supplier :BPB Formula
Bowbridge Lane
Newark
Nottinghamshire
NG24 3BZ
United Kingdom
Telephone 0044 (0) 1636 670200**2. Hazards Identification****Description of hazard:**

These products are not classified as dangerous/hazardous under Chemicals (Hazard Information and Packaging for Supply) Regulations 2002 (Chip 3).

Additional effects for people and environment:Powders may irritate eyes or sensitive skin
Dust may irritate respiratory system**3. Composition / Information on Ingredients****Chemical composition:**

Principally calcium sulphate dihydrate (gypsum) and natural constituents, which may include clay, limestone and trace amounts of quartz.

CaSO₄ x 2 H₂O

CAS number 10101-41-4 (gypsum)

Dangerous substances:

CAS – No.	Name	Content	R - Phrase	Category of Danger	OEL
None	None	None	None	None	None

Refer to section 16 - Other Information for full details of R-Phrases and danger categories

Other Substances: Substances with Community Workplace Exposure Limits

CAS – No.	Name	Content	WEL Long Term (8hr) mg.m ⁻³	WEL Short Term (15 min) mg.m ⁻³
10101-41-4	Gypsum	>85%	10 Inhalable 4 Respirable	None

4. First-Aid Measures**General instructions:**

Medical attention is advisable if any symptoms persist

Inhalation:

Remove person to fresh air

Skin contact:

Flush skin with running water before washing with water and soap

Eye contact:

Wash the eyes, including opening eyelids, with plenty of clean water (minimum 15 minutes) and seek medical advice if irritation persists

Ingestion:

Wash out mouth and drink plenty of water

Material Safety Data Sheet

91/155/EEC

Revised : 27 / 03 / 2007

Date of Printing : 22/10/2007

Page : 2 / 4

Specific information for Doctor:

None

5. Fire Fighting Measures

Suitable extinguishing media:

All fire extinguishers are suitable media observing normal fire fighting procedures

For safety reasons extinguishing media which must not be used:

None

Special exposure hazards arising from dust combustion or gas development:

At high temperatures (more than 1200 °C) sulphur trioxide will be produced

Special protective safety equipment for fire fighting:

None

Additional information:

The product will not support combustion but the packaging may burn

6. Accidental Release Measures

Personal precaution measures:

Control and suppress dust formation

Environmental precaution measures:

Prevent powder contaminating drains and watercourses

Prevent slurry contaminating drains and watercourses

Method of cleaning / sweeping up:

Mechanical pick up (vacuum) or sweep and shovel into bags

Refer to section 8 – Exposure Controls/Personal Protection

Refer to section 13 – Disposal Considerations

7. Handling & Storage

Handling:

Minimise and control dust when opening bags

Avoid prolonged or repeated contact with the skin or any eye contact

Wear protective clothing when mixing or working with powdered products

Storage:

Supplied in bags, on pallets. Store in dry conditions and on firm level ground to maintain pallet stability

If manually handling use correct Manual Handling techniques

8. Exposure Controls / Personal Protection

Exposure Limit Values:

Components with exposure limit values (workplace exposure limits or biological limit values)

CAS – No.	Substance	WEL Long Term (8hr) mg.m ⁻³	WEL Short Term (15 min) mg.m ⁻³
10101-41-4	Calcium Sulphate (Gypsum)	10 Inhalable 4 Respirable	-
-	Quartz (Silica)	0.1 Respirable	-

Exposure Controls:**1) Occupational exposure controls****Respiratory protection:**

Control dust formation and ventilate the area of work. If dust concentration is above occupational exposure limits then a respiratory filter/face mask to EN 149 :2001 FFP1 minimum should be worn

Hand protection:

To avoid prolonged or repeated wet contact wear impermeable gloves. To reduce the effect of hand contact apply a barrier cream

Eye protection:

If powder contact or splashes are likely wear safety goggles to BS EN 166

Body protection:

To avoid skin contact wear protective overalls and footwear

2) Environmental exposure controls:

Gypsum based preparations are not known to have high potential to damage the environment

9. Physical and Chemical Properties**General Information:**

Appearance: Solid in powder form, off white
Odour: Odourless, except occasionally slight musty odour

Important health, safety and environment information:

pH value 6-8 in 10% aqueous solution (distilled)
Relative Density Approx. 2.5 – 3.0 g / cm³
Solubility in water Approx. 2.0 g / L

Other information:

Thermal decomposition to CaSO₄ and H₂O approx. 140°C
Thermal decomposition to CaO and SO₃ approx. 1200°C

10. Stability & Reactivity

Under normal conditions of use these products are stable and unreactive:

Conditions to avoid:

No dangerous reactions are known

Materials to avoid:

None

Hazardous decomposition products:

None under normal conditions of use

When working with higher temperatures (over 1200 degree Centigrade) hazardous sulphur trioxide can develop.

11. Toxicological Information**Toxicological (health) effects:**

No known available evidence indicating adverse toxicological health effects for acute toxicity, corrosivity/irritation, sensitisation, repeated-dose toxicity, mutagenicity, carcinogenicity, or reproductive toxicity.

Exposure:

Inhalation – Gypsum powder may irritate respiratory system, no known long term effects

Ingestion- Small amounts of gypsum powder should not cause any significant reaction or long term effect

Skin contact- Gypsum powder may dry skin leading to irritation if contact is prolonged or skin is sensitive

Eye contact – Powder may irritate by particulate in the short term

12. Ecological Information

No known negative ecological effects

Products are sparingly soluble in water, forming a solution/slurry and solidifying

13. Disposal Considerations**Packaging disposal:**

Dispose of empty bags in accordance with local Environment Agency Regulations

Product disposal:

Dispose of product in accordance with local Environment Agency Regulations

Material Safety Data Sheet

91/155/EEC

Revised : 27 / 03 / 2007

Date of Printing : 22/10/2007

Page : 4 / 4

14. Transportation Information

No special precautions exist with respect to transport
Not classified as hazardous for transport

15. Regulatory Information

Safety Data Sheet prepared in accordance with:

Chemicals (Hazard Information & Packaging for Supply) Regulations 2002 - CHIP 3
Approved Code of Practice (L130). "The compilation of safety data sheets" Third edition
The Control of Substances Hazardous to Health 1999 (COSHH)
COSHH Essentials: Easy steps to control chemicals

16. Other Information

Sources of key data used to compile Safety Data Sheet:

Approved classification and labelling guide – Guidance on regulations L131
Approved Supply List (L129) Seventh edition
HSE EH40 Occupational Exposure Limits (current edition)
This information reflects typical values and is not a product specification
No warranty is hereby expressed or implied

Note to user:

This safety data sheet does not constitute the users own workplace risk assessment, which is required under COSHH Regulations 1999

Written enquiries should be addressed to:
